About

Computer Engineering student at Marmara University with experience in building full stack applications using **Java**, **Spring Boot**, and **React**. Worked with **RESTful APIs**, **microservice structures**, and **modern web interfaces**. Used **Docker** for containerizing applications and managing deployment workflows. Familiar with working in **Agile** teams. Currently looking for opportunities to improve my **full stack and DevOps** abilities.

Experience

Part-time Data Engineer <i>Brisa Bridgestone Sabancı, Istanbul</i>	September 2025 – Present
<ul style="list-style-type: none">Gaining practical experience in Agile project management methodologies, actively participating in sprint planning and daily workflows.Processing complex datasets using Python and implementing mathematical models via Gurobi for a vehicle capacity and routing optimization project.	
IT Intern <i>Brisa Bridgestone Sabancı, Izmit/Kocaeli</i>	July 2025 – September 2025
<ul style="list-style-type: none">Used platforms like Jira and Bugzilla for issue tracking, project management, and task coordination.Analyzed REST and SOAP web services to understand service behavior.Used tools like Postman and SoapUI to inspect and test API requests and responses.	
Software Engineering Intern <i>Smartera Software Solutions, Istanbul</i>	July 2024 – September 2024
<ul style="list-style-type: none">Gained hands-on experience in backend software development using Java and Spring Boot.Developed responsive web interfaces using HTML, CSS, JavaScript, and React to integrate with backend microservices.	

Education

Marmara University <i>Computer Engineering — 3.23</i>	Istanbul, Turkiye 2022 – Present
---	-------------------------------------

Projects

Order Managing App	<ul style="list-style-type: none">Developed a Spring Boot backend for managing customers, orders, and products in a structured web application.Designed the system using both monolithic and microservices architectures.Built the project as a RESTful API, implemented CRUD operations with proper request validation, error handling, and standardized response structures.Used Docker and Docker Compose for containerization and deployment.
Personal Portfolio Web Application	<ul style="list-style-type: none">Developed a responsive web application using React, Next.js, and TypeScript.Designed modern UI with Tailwind CSS.Managed version control and project structure using Git and GitHub.

Tech Stack

Full Stack Development: Java, Spring Boot, Typescript, React
Architecture & API Design: RESTful API, JWT, MVC, DTO
DevOps: Docker, Docker Compose, Microservices Architecture, API Gateway
Developer Tools: Git, GitHub, Jira, Postman, Swagger, SoapUI
Other: Python, SQL, Power BI

Languages

Turkish: Native
English: B2 (YÖKDİL: 71/100)

Affiliations

Sabancı Foundation Scholar
